Response to Amendment

The rejection of claims 1-4, 6, 8-9, and 16-17 under 35 U.S.C. 102(b) as being anticipated by Shi et al, 5,75,999 is moot in view of applicants' amendment.

The rejection of claims 1-6, 8-9, 13, 16-17, and 22 under 35 U.S.C. 102(b) and (e) as being anticipated by Tsuboyama et al, US 2003/0054798 A is moot in view of applicants' amendment.

The rejection of claims 1-5, 8-9, 13-14, and 16-17 under 35 U.S.C. 102(b) as being anticipated by Lin et al, is moot in view of applicants' amendment.

The rejection of claims 1-4, 16-17 and 22 under 35 U.S.C. 102(e) as being anticipated by Kim et al, 6,800,380 is moot in view of applicants' amendment.

The rejection of claims 1-5, 8-9, 13-14, 16-17, and 22 under 35 U.S.C. 102(e) as being anticipated by Che 6,653,654 B1 is moot in view of applicants' amendment.

The rejection of claims 7, 15, and 21 under 35 U.S.C. 103(a) as being unpatentable over Che, 6,653,654 B1 or Lin et al, is moot in view of applicants' amendment.

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 1774

2. Claims 11, 12, 17, 19, 20, 23, and 24 are provisionally rejected under 35

U.S.C. 101 as claiming the same invention as that of claims 1, 6-7, 9-10, and 15-18 of

copending Application No. 10/835,481. This is a provisional double patenting rejection

since the conflicting claims have not in fact been patented.

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 23 and 11 are rejected on the ground of nonstatutory obviousness-type

double patenting as being unpatentable over claims 1 and 3 of U.S. Patent No.

6,653,654 B1. Although the conflicting claims are not identical, they are not patentably

distinct from each other because the dopant complex of the present claims is fully

embraced by the emissive complex of the patented claims.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1774

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-9, 13, and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

More specifically, the preamble of these claims is drawn to "a heterostructured organic light-emitting device", whereas the preamble of claim 22 is drawn to a method. Accordingly, the metes and bounds for which patent protection is being sought are not clear.

5. Claims 15, 21, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1774

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
